

Group Enrollments Options

For Not-for-Profit Organizations and Community Groups

There are a 4 ways we can set up User Membership accounts for organizations:

- 1. Pre-Made Membership Accounts** – The organization purchases XX number of accounts, we set-up the accounts, and issue a pre-made list with the User ID's and passwords, which can then be distributed to clients; or
- 2. Membership Accounts Set up as Needed** – The organization purchases XX number of accounts, when a new registration is required the required information is gathered for a new user and sent to us to create the user account. The accounts will be set up for within a few hours on business days when received before 3pm and we then email the user the login information to the organization and/or the client; or
- 3. Membership Cards** – The organization purchases XX number of accounts, we issue Membership Cards with the User ID's and passwords already set up, which can then be distributed. We would have to mail the cards out. (we charge for the shipping for orders of less than 20 cards); or
- 4. License PINS for a Set Amount of User Accounts** – The organization purchases XX number of accounts and we issue a License PIN good for XX number of accounts. The organization administers the user accounts (add users, assign courses, place in groups). This option requires training of administrators.
